sankhya InfoTech Opens US Subsidiary

Marina CA and Secunderabad, India – 27 September 2006, sankhya InfoTech Ltd. (HSE: SNF), a worldwide leader in providing Training and Resource Optimization Solutions to the Aviation, Defense, Oil & Gas, and Manufacturing marketplaces, announces today the opening of its new US subsidiary, sankhya US Corporation based at the University of California's MBEST Center in Marina CA.

sankhya US Corporation will be dedicated to bringing the same high levels of quality, technology innovation and superior process to customers in the United States and Canada. The subsidiary has located within the University of California Santa Cruz's MBEST center, which provides a center of excellence for innovation in marine, environmental, and information sciences and technologies.

"For close to a decade, we've established ourselves as a premier supplier of training, simulation and resource optimization solutions throughout India, the Middle East and Europe and we now feel that we are in an enviable position to become not just a European leader but a global leader in our sector", said Sridhar Nadupalli, President and CEO of sankhya InfoTech Ltd (Stock symbol), "The opening of the US office and addition of Stu Taylor to head our efforts there highlights Sankhya's commitment to expanding our offerings to further penetrate the global market", Sridhar added.

Stu Taylor, a training and simulation market veteran, with over 20 years experience in sales, operations and executive management has been appointed Executive Director of the new venture. In this role, he is charged with building a strong and robust sales and support operation that will leverage all aspects of the sankhya suite of products and services.

"I am excited about the opening of this new office here in Marina, which allow us to bring sankhya quality and dedication to task, to new US customers", said Stu Taylor Executive Director of sankhya US Corporation. "sankhya has a cost-competitive approach to providing complete IT solutions in training, eLearning, 3D content creation, simulation and resource optimization for civil aviation, defense and manufacturers of other complex products. And sankhya's efficiency and quality is second to none."

sankhya

sankhya's flagship product, Silicon™ ATHENA™ brings training management to the enterprise level with an integrated product allowing instructor, student, courseware designers, administrators, and corporate managers to efficiently manage their training processes.

About sankhya US Corporation – Sankhya US is a recently formed wholly owned subsidiary of sankhya Infotech Ltd. Established in 2006, the subsidiary is already providing products and services to US customers.
